Number in a Box

Number in a Box gives you your own phone number for inbound calls so that customers can reach you more easily.

Take full control of your number with real-time reporting and the ability to change routing with the click of a button.

Missing a call will be a thing of the past with the ability to divert all calls to an alternative line quickly and easily, either online or through the app.

What can Number in a Box do for your business?

- Home-based business? Don't use your residential phone number when advertising
- Improve professionalism: offer more than just a mobile number for contact
- Use a different number for each catchment area
- Expand the footprint of your business: be the "local contractor" in more than one area
- Track the results of your marketing more accurately

What does Number in a Box offer?

- Any UK exchange (01, 02) or non-geographic (e.g. 0330) number
- International numbers for almost anywhere in the world
- Ability to direct calls to up to seven different devices or destinations
- Free app for controlling the service (iOS or Android device)
- Full access to web-based portal for comprehensive management settings
- Free call alerts for missed calls
- Fully itemised monthly bill

Call service options include

- IVR auto attendant: automated menu for callers (e.g. "press 1 for sales, press 2 for...")
- Call recording: cloud-based recording of your calls, delivered by email or FTP
- Time & day routing: set different procedures e.g. for hours of opening
- Mid-call transfer: pass the call on to another destination
- Voicemail: receive messages as attachments to specified email addresses
